Soluble Systems, LLC Appoints William A. Williams to serve as Operations Director

(Newport News, Virginia) Soluble Systems, LLC announced today the appointment of William A. (Bill) Williams Operations Director. Mr. Williams will take charge of meeting the rapidly increasing market demand for TheraGauze™. TheraGauze™ is an advanced primary wound care interface designed to help heal challenging wounds such as diabetic foot ulcers, venous stasis ulcers and pressure sores.

“We are delighted to have such an innovative and experienced manager join the Soluble Systems’ team,” said T. Kerry McCarter, Chief Executive Officer. “Bill will have responsibility for our Hampton, Virginia Clean Room manufacturing site and all Supply Chain related processes.”

Mr. Williams has over 25 years of technical leadership experience in the medical device industry. He has an extensive background in manufacturing, quality assurance, technical service and R&D. His work in the area of Research and Development resulted in several patented “first to launch” products. Mr. Williams recently served as Laboratory Manager for Marchem Southeast, a subsidiary of Dash Multicorp. In this capacity he was responsible for implementing an I.S.O 9001:2000 quality system and managed product development. Prior to joining Marchem Southeast he was the Senior Research and Development Chemist for Best Manufacturing Company, a subsidiary of the Tillotson Corporation. Mr. Williams holds an Associate Physical Science degree from George C. Wallace Community College, attended Troy State University, and holds a B.S in Organizational Management from Covenant College.

About TheraGauze™

TheraGauze™ creates an optimal healing environment by delivering moisture differentially across a wound. When moisture is needed, TheraGauze™ provides moisture without maceration over multiple days. When absorbency is needed, TheraGauze™ will absorb light to moderate exudate. The reduced number of dressing changes required, along with the absence of residue, sticking and pain, enhances healing and improves professional efficiency. TheraGauze can also be highly effective in combination with absorbent cover dressings to accommodate heavier exudate.

TheraGauze™ is a white opaque dressing that is flexible, but retains form in contact with the wound. It is available in two sizes: 2x2 inches and 4.125x4.125 inches. Ordering and representation information can be found at www.solublesystems.com.
